

SMART PRODUCTS

Introducing an exciting new range of Smart Sterilisation and social distance products that are ideal for hotel rooms and reception.

BACK TO WORK WITH CONFIDENCE

UVC (along with UVA and UVB) is one of three types of Ultra Violet light that has a short energetic wavelength of between 200-280 nanometres (nm). Over a century ago scientists discovered the ability of UVC to kill microorganisms at the DNA level and it has since been used regularly for sterilisation in hospitals, warehouses, workshops, offices, clothing outlets, airlines and the sanitisation of drinking water.

THE SMART DISTANCE DEVICE

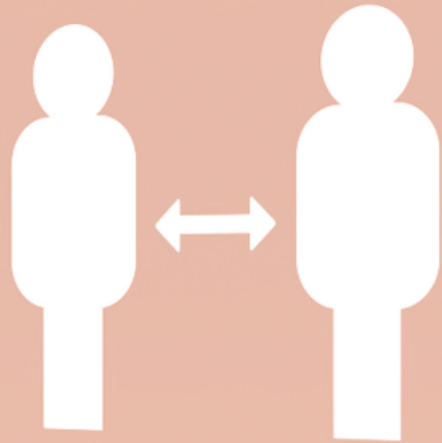

The smart distance awareness device is a convenient reminder to your employees and customers to maintain healthy distancing.

Staying 6 feet apart simply doesn't come naturally.

KEEP YOUR DISTANCE

THANK YOU

AuraAware
www.aura-aware.com

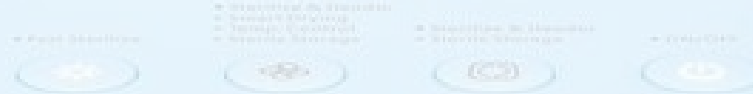

The patented technology scans the room to detect if anyone is within the 6 feet distance.
A red alert warns employees and customers when they have gotten too close.

Works straight from the box.
Sound can be turned off.
An app on the phone sets the preferred distance.
